Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently amended): An isolated nucleic acid encoding a ~~mammalian~~ CTLA protein ~~or fragment thereof~~ comprising an amino acid sequence of SEQ ID No.: 6 or 8.

Claims 2-22 (canceled)

Claim 23 (Currently amended): The isolated nucleic acid of claim 1, wherein the protein induces ~~an~~ at least one inflammatory mediator ~~such as selected from the group consisting of~~ IL-6, IL-8, ~~or and~~ PGE2.

Claim 24 (Currently amended): A ~~An isolated~~ nucleic acid sequence that hybridizes under stringent conditions of 65° C and 150mM salt to a the nucleic acid sequence of ~~claim 2 or fragment thereof~~ claim 1.

Claim 25 (Currently amended): A nucleic acid isolated using a cDNA encoding a nucleic acid of ~~claim 2 or fragment thereof~~ claim 1.

Claim 26-28 (Canceled)

Claim 29 (Currently amended): An recombinant expression system for a nucleic acid comprising a nucleic acid expression vector wherein the nucleic acid of claim 1 is operably linked to suitable genetic control elements that are recognized in a suitable host cell.

Appl. No. 09/929,612
Amdt. August 21, 2003
Reply to Office action of June 16, 2003

Claim 30 (Previously presented): The expression system of claim 29 wherein the host cell is a prokaryotic cell.

Claim 31 (Previously presented): The expression system of claim 29 wherein the genetic control elements are comprised of a prokaryotic promoter system, prokaryotic ribosome binding site, and a prokaryotic transcription termination signal.

Claim 32 (Previously presented): The expression system of claim 29 wherein the host cell is a eukaryotic cell.

Claim 33 (Previously presented): The expression system of claim 29 wherein the genetic control elements are a eukaryotic promoter system, a eukaryotic ribosome binding site, and eukaryotic transcription termination and polyadenylation signals.

Claim 34 (Previously presented): The expression system of claim 29 wherein the host cell is a yeast cell.

Claim 35 (Previously presented): The expression system of claim 29 wherein the host cell is an insect cell.

Claim 36 (Previously presented): The expression system of claim 29, wherein the expression vector is an insect baculovirus expression vector.

Claim 37 (Previously presented): The expression system of claim 29 wherein the host cell is a mammalian cell.

Claim 38 (Currently amended): The expression system of claim 29 wherein the host cell is a ~~Chinese~~ Chinese hamster ovary cell, a monkey cell, or baby rat kidney (BRK) cell.

Claim 39 (Currently amended): The expression system of claim 29, wherein the expression vector does not replicate (~~autonomously~~) autonomously in the host cell.

Appl. No. 09/929,612
Amdt. August 21, 2003
Reply to Office action of June 16, 2003

Claim 40 (Previously presented): The expression system of claim 29 wherein the expression vector is transformed into a cell which provides a specific glycosylation pattern.

Claim 41 (Previously presented): The expression system of claim 29 wherein the expression vector is co-transformed into a cell with one or more genes encoding mammalian or other glycosylating enzymes.

Claims 42-45 (Withdrawn)

Claim 46 (New): The nucleic acid of claim 1, wherein the nucleic acid comprises a sequence of SEQ ID NO: 5 or 7.
